Candidate's Statement (reproduced exactly as submitted):

I care deeply about our city and greatly value the quality of life it affords to our residents. Although I just recently moved back into city limits, I have spent much of my life being raised, going to school, and working here. Throughout all of it, living here has helped positively shape my life and fueled personal aspirations of serving where I can most effectively contribute back to our community so others can continue to benefit from all our city has to offer and find the sense of home here that I have.

As a member of your city council, some of the issues most important to me would include:

- Improving parks and trail systems for better outdoor recreational opportunities.
- Pursuing reasonable spending policies and protection of our low property tax rate.
- Protecting the health and wellbeing of our local environment and community.
- Exploring efficiency gains through broader interagency collaboration and resource sharing.
- Cultivating a landscape friendly to small business growth and sustainable operation.

I strongly believe in open communication with the public. As elected officials, it is our job to represent you and I look forward to doing so. Please feel free to contact me at any time!
